Modular Head-to-Toe Solution

The PRO is available with a complete selection of superior 3DEEP® treatment handpieces

Intensif RF Microneedling Handpiece

Targeted to treat acne scars, deep wrinkles, stretch marks and other conditions requiring fractional deep dermal heating.

iFine Handpiece

Specially designed for the treatment of wrinkles and lax skin on delicate skin tissue around the eyes and mouth

Fractional Ablative Skin Resurfacing Handpiece

Specially designed for fractional skin resurfacing and treatment of skin roughness, hyperpigmentation, wrinkles and scars on both facial and body areas.

Small Handpiece

Specially designed for skin laxity treatment of smaller areas such as the cheeks, Submental, décolleté and neck.

Mini Shaper Handpiece

Focused RF treatment for the jaw-line, Submental, arms and knees.

Contour Handpiece

Specially designed with innovative RF + Vacuum technology to provide the ultimate in body contouring and cellulite reduction treatments.

Shaper Handpiece

For superior body tightening, contouring and shaping treatments

The ENDYMED Difference

1. **A Premium Brand:** ENDYMED Medical is a worldwide-recognized brand with an extensive global presence.
2. **Our Partnership Advantage:** Exceptional service, flexible upgrades and comprehensive training.
3. **Extensive marketing support:** Collateral to help your practice grow with a high return on investment from the very start.

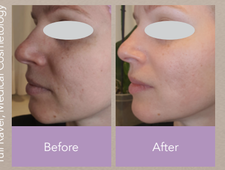

ENDYMED 3DEEP SKIN SCIENCE
Clinically Validated in multiple studies

Over 15 Treatment Protocols

- Fractional resurfacing
- Skin tightening
- Wrinkle reduction
- Body contouring
- Texture improvement
- Cellulite reduction
- Circumferential reduction
- Acne and acne scar reduction
- Traumatic scar reduction
- Stretch mark reduction

Confidence is **3DEEP®**

ENDYMED™ | PRO

Superior RF Multi-Treatment Platform

Power & Precision

The ENDYMED PRO all-in-one treatment platform grows as your practice grows for impressive ROI

ENDYMED™ | PRO

Superior RF Multi-Treatment Platform

Looking to take skin refining to new heights? Demand for non-surgical aesthetic procedures has never been greater, with the market expected to grow globally from 2022 to 2030 at a CAGR of 15.2%*.

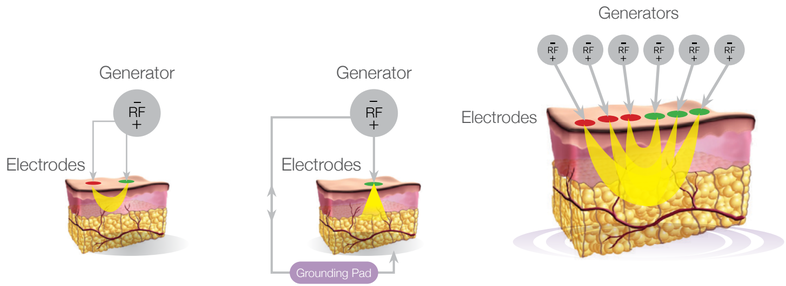

Reach for those heights with EndyMed: the RF legacy leader and inventor of 3DEEP® technology – the most advanced radiofrequency solution available today, validated in over 40 clinical publications.

The EndyMed PRO, powered by 3DEEP® technology, offers aesthetic professionals a modular head-to-toe solution that grows with your practice. Our all-in-one treatment platform is flexible, upgradeable and delivers an impressive ROI.

Non-invasive Aesthetic Treatment Market Size, Share & Trends Analysis Report By Procedure (Skin Rejuvenation, Injectable), By End Use (Hospital/Surgery Center, MedSpa), By Region, And Segment Forecasts, 2022 - 2030

ENDYMED 3DEEP® Vs. RF Competitors

A

Bipolar and x-polar RF - relatively superficial and less efficient

B

Monopolar RF - energy flows uncontrolled in the tissue, requiring intense cooling

C

3DEEP RF - focused and contained deep energy flow with no need for cooling

The EndyMed PRO is powered by superior, clinically validated 3DEEP® RF Technology. Now with 85W, the EndyMed PRO is the most powerful and focused RF treatment technology available today.

Unlike Monopolar or Bipolar RF technology, which is more superficial and can often be painful or risky to the epidermis, 3DEEP's non ablative skin tightening hand pieces deliver controlled energy to the depth of the dermis, reaching 52°-55°C, with minimal epidermal heat. This is achieved through gently focusing the device energy into the dermis for optimal, painless collagen remodeling.

EndyMed's 3DEEP technology incorporates real time skin impedance monitoring, providing the most optimal energy to the treatment target area by making continuous adjustments based on the tissue impedance over the current treatment area.

Infinite Possibilities
4 Technologies in one Platform

The EndyMed PRO uniquely bundles fractional and non-fractional technologies in one versatile system.

Focused RF

Energy is delivered deeper into the skin for unparalleled deep volumetric heating and clinically proven results.

RF Microneedling

Advanced RF Microneedle technology for optimal comfort and results.

3DEEP Core Technology

The only RF technology utilizing 6 RF generators that work simultaneously, enabling complete phase control.

Fractional skin resurfacing

The only Applicator on the market with both Fractional Ablation & 3DEEP RF Heating. Smooth scanning technology for absolute ablation control. Ablation only effects the epidermal layer yet with superior volumetric heat penetration.

Vacuum-assisted technology

Modulated pulsed vacuum technology uniquely enables deeper heat penetration for superior results – without the need for a cooling system.
